

Decoy (Noel Casey Book 1)

Lieutenant Noel Casey is taken aback by her newest assignment, overseeing a genetically engineered soldier designed by the United States Army. She's not accustomed to working with people created for warfare, and Killian's indifference is making it difficult to see past his robotic demeanor. But when Noel is attacked and Killian intervenes, their relationship is altered. The predator is now the protector in Noel's eyes, and she's unsettled by her growing captivation with the intimidating man. Plagued by nightmares since arriving at Fort Braeden, Noel begins to question the true reason for her relocation, an answer she's convinced lies with the reticent Killian. Torn between accepting unconvincing explanations and rejecting her comfortable ignorance for an unimaginable truth, she realizes the choice has already been made for her. Noel's understanding of science is about to be shattered.
