

## Fiberglass Boat Survey

Arthur Edmunds has created a tremendously informative book concerning fiberglass boats and their systems. Fiberglass Boat Survey will guide you through the process of choosing a boat type for your intended use. This book then continues by detailing exactly what you should inspect on any boat before you make an offer of purchase. Granted, a professional surveyors report will be required at a later date to secure financing and insurance, but this book will guide you through the same process the professional surveyor will use. When you complete your own survey, you will have a list of the positives and negatives which you can hold in hand at the time of your offer. This step will not only enable you to make a fair offer, but also will certainly prevent surprises when the surveyor files the final report. You will not have your hopes built up only to have them dashed by the professionals report. You will know all of the information before you make your first offer. This book also offers information for locating, hiring, the customary fees for, and interaction with the professional surveyor. If only there were a book like this for used cars!
