

The Fires of Beltane

What was supposed to be a celebration of life turns into a festival of fear...Natalie Devonshire is nervous about attending the invitation only, annual Beltane feast. She heard it can be wild and naughty and though intrigued, she plans only to observe. That is, until she meets handsome William Zapata, who convinces her that trying something new can be as fun as it is daring. Williams been coming to this festival for several years, for one reason only to spend time with his sometime lover. When he meets Natalie outside the gates, his interest is immediate. Hes drawn to her, and as backward as this celebration makes their introductions, his intention is to keep seeing her long after the festival ends. Not all is a bed of roses, however. Some attendees see the festival as a way to meet needs of a darker nature. Beltane not only has a history rich in fertility and life, but also has historical ties with the occult. This includes human sacrifice and all the necessary preparations are in order. When people begin to disappear and death explodes around the celebrants, panic ensues. Trapped and confused, can Natalie and William find out who is behind the destruction of this celebration and stop the spiralling events before they become part of the sacrifice themselves? And when all is said and done, will the attraction between them be strong enough to last, or will they discover their interest was fleeting and best left burning with the fires?
