

# Champions of the Church

Contents: Pope Clement VI; Pope Innocent VI; Pope Urban VI; The Anti-Popes; Saint Paul - The Hermit; Saint Ursula; Pope John XXII; Pope Martin V; Pope Paul II; Malleus Maleficarum; Tomas De Torquemada; Ferdinand and Isabella; Pope Alexander VI; Martin Luther - Parts 1 & 2; John Calvin Parts 1 & 2 \*\*\*In a book we have in our library titled History of the Conflict between Religion and Science written by John William, Draper (1811-1882), we re-produce the following excerpt that more fully-sums up our personal opinion of Judeo-Christianity: \* Whomsoever has had an opportunity of becoming acquainted with the mental-condition of the intelligent-classes in Europe and America, one not so-deeply indoctrinated into a Theistic Scheme must surely have perceived that there is a great - and rapidly-increasing departure from the public religious faith of old - and that, this aspect of divergence - among the more frank - is no longer concealed as it once was! There is, thus, a far more extensive and far more dangerous secession both private and unacknowledged. So wide-spread - and so powerful is this secession - that it can neither be treated with contempt nor with punishment - as it once had been! It, thusly, cannot be extinguished by derision, by vituperation and/or by force - as it once had been! From our perspective, the time is rapidly approaching when such religio-scientific conflict will give rise to some serious political results! As we see things in a 21st century, that time is now! Ecclesiastical spirit no longer inspires the policy of the world; military fervor - on behalf of fighting for faith - has long disappeared; its only souvenirs are marble effigies of Crusading Knights reposing in silent crypts with epitaphs on their tombs housed within lavishly-decored churches! That a crisis is impending is well-shown by the attitude of Mighty-Powers toward a Papacy that

represents SuperNatural ideals & aspirations of huge numbers of the population of Europe. It ever-insists upon a political supremacy in accordance with its claims to a divine origin and mission - and - a restoration of the medi?val order of things; virtually-declaring that it will accept no reconciliation with modern civilization! Its tradition is all that matters! Consequently, a growing antagonism is more & more witnessed between Religion and Science - a continuation of a struggle that commenced when Judeao-Christianity began to attain political powers in the 5th century CE. Can we exaggerate the perceived importance of a belief system in which every thoughtful-person [must] take part - whether he will chose to do so or not? Those Priestly Ones seek information concerning subjects in dispute; thus use this info to make the subject bend at the knee! The history of Science is not a mere record of isolated discoveries; it is a narrative of the conflict of two-contending powers, the expansive force of the human intellect on one side, and the compression arising from traditionary faith and human interests on the other! It was once deemed a proper course of discussion to abstain from all criticism of religions - and thus keep the subject as far as possible in the background. However, for the sake of societal-tranquility such falters upon the stability of religious convictions that reek of SuperNaturalisms, and do so to make it appear that [no-one] can be justified in wantonly disturbing them! Science, in its nature is progressive; and eventually a notable divergence between Theism and Science is now impossible to conceal; as such must take soon take place. When such an awakening happens, it will then become the duty of those whose lives have made them familiar with both modes of thought - to make a choice - to present modestly, but firmly, their anti-theism views! History shows that, if this be not done, social misfortunes, disastrous and enduring, will invariably-ensue!
