

A Book About You (Winner Classics) (Volume 27)

A book That Is Really About You! Do you know that everything in this universe vibrates? Even your life itself is a vibratory activity that conforms to precise natural laws. These laws never change and always stay the same. If you want to understand why the universe is the way it is, you must understand how vibrations operate and manifest. You will get you on your way. In this book A Book About You, the follow-up work to The Master Key System by Charles F. Haanel, he explores a range of subjects from astronomy to astrology, from physics to alchemy, and much more. Matter in motion and ether under strain constitute the fundamental principles with which we have to do in physics. These are both vibratory activities. We speak of them as if there were two principles; there is, however, but one principle with a dual manifestation: it is cause and effect. Matter in motion puts ether under strain, ether under strain puts matter into motion. All phenomena in the Universe are the result of the operation of this basic principle. Let us check up on those with which we are most familiar. You wouldnt believe that the deep knowledge the book offers also include in these terms how the planets affect us. Must read for those on the journey to self discovery. Pure esoteric knowledge and very few have known these insights from the book. The movie The Secret talked about vibes or vibrations. Now, this book goes into greater depth in relations to the idea of all things as vibrations; particularly with regard to the astrological effects of planetary movements on the vibrations of earthy life and thought. Read 1 to 2 pages daily and meditate on the book to get the true nature of Nature. Original editions of this book fetch hundreds of dollars. The book explains why: 1. Certain things happen to you 2. Vibrations are what is this whole world is made up of 3. Astrology is an important subject 4. You

always have choices that are under your control And many more! Charles Haanel once said: You must first have the knowledge of your power; second, the courage to dare; third, the faith to do. The book gives you the knowledge about your environment and about yourself. Scroll Up and Get Your Copy!
