

Daily Pearls: Inspiration and Wisdom for Each Day of the Year

While most gemstones are buried deep within the earth's core, the pearl is found in a living organism, the oyster. The pearl is created during the biological process the oyster uses to protect itself from dangerous parasites and damaging debris. When an invading irritant enters into the pearl, it will work to protect itself by covering up the foreign particle with layers of nacre, the composite material that the oyster's mantle uses to create its shell. Thus, out of the oyster's trouble comes a beautiful object, the pearl. We, too, have infinite potential to create beautiful pearls. When we use hope, faith, charity, kindness, wisdom and most importantly, love, to protect ourselves and others, we can transform our trials and trouble into priceless treasures. This book contains 365 inspirational gems (plus bonus pearls) which cover 64 topics that will encourage and protect you. May this book draw you closer to the Divine Creator of the Universe God, to help you become His pearl and create the beauty in the world that you were born to manifest.
