

Faith and Reason: IN SEARCH OF GOD The God of Spirituality (Self-help and Spiritual Series)

Religions and prophets have been preaching about God for centuries, and millions of people have developed faith in their concept. The revolution of science and technology in this century has forced many of us to reevaluate the doctrines and tenets received through our religious traditions. Should we believe in creation or should we believe in evolution? Should we believe in heaven and His court of justice when we look up in the sky or should we believe in the space, the planets, and the galaxies up there? I hope this write-up will provide a fresh insight into the mysteries about God -- and leave us wiser, peaceful, and enlightened. God and spirit is no more another worldly belief in fate, luck, chance, or coincidence. For the new generation of 21st century, we should be able to make sense of the real world, find peace in the midst of turmoil, and discover hope and joy. The God is not in church or mosque or temple only that appears every Sunday. God is also not sitting somewhere in the sky watching our actions. The God is in us 24-hours a day. If we can't see God in all, we can't see God at all. We need scriptures that can teach us all humans are capable of achieving union with God while still alive by realizing the Divine within. We want to become one with God and experience it.

This book will lead us towards spiritual meditation and permanent peace; representing the best that East and West have to offer since the author is educated at Yale University in the West and Punjab University in the East. The reader will understand the concept of God, which constitutes the spiritual basis of living. This understanding will lead us to love and happiness irrespective of our faith.
