

Make Money Selling Products on YouTube

This book is designed to show you how to make money selling products on YouTube. These products can be information products (such as eBooks, online courses, audio programs, video programs), affiliate marketing products (such as those found on ClickBank) as well as physical products (such as clothes, household goods, cars, the list is endless). If it exists, you can sell it on YouTube. This book will show you how to: Sell products on YouTube Understand YouTube affiliate marketing Create compelling sales videos Setup a YouTube account and channel Drive traffic and generate sales Develop review and how to videos to increase sales Perform effective keyword research Cloak links (essential for affiliates) Promote your YouTube videos Link to invaluable resources Learn from example case studies I personally make over \$3000 per month on YouTube, sometimes more than \$5000 per month in passive income selling affiliate products on YouTube. So I can say in all confidence that YouTube works and if done correctly you will make money. There are, however, no shortcuts. You do need to put the initial work in to set your videos up. Yes, everything is easy once the work is complete and your videos have been uploaded, but the work has to be done first before the checks come rolling in. This book will show you how to make that happen. Making money from YouTube isn't difficult and once you understand the process for creating and uploading videos, it's actually quite easy to generate profits on this wonderful platform. In my opinion, YouTube isn't going away and it's only going to get bigger. You now have access to all the knowledge and resources you need to start building your own revenue streams on YouTube.
