

## Janes Air Traffic Control 1996-97

This is a guide to civil and military air traffic control equipment and software used by airports and ATC authorities worldwide, covering 750 systems from 500 suppliers. Almost every available system in production and development is covered, including systems for air traffic management, communications, information, nav aids, landing aids, meteorology, noise measurement, airfield lighting, aircraft guidance and training. The addresses and contact details of the world CAAs and their senior decision-makers are provided.
