

LNER Carriages

Michael Harris is the acknowledged expert on LNER, and indeed a number of other types of railway coach. The author of three books on LNER vehicles, all have been out of print for some time leaving a considerable gap in the market for those who yearn to obtain a copy of one of the definitive works on the subject. This paperback reprint will go some way to filling that need, and is reproduced on quality art paper and at a fraction of the price the market had been asking for secondhand copies.
