

Moon-Tide (The Lone March Series Book 5)

I was a bag of bones. I still had skin and hair and probably pumping blood, but for all intents and purposes, I was cadaverous. Being at the center of the wereworlds biggest conflict has finally landed March Howe in the ultimate mortal peril for a wolf: the middle of a cat lair. Surrounded by silver, she finds herself trapped by more than just the room shes confined to. Endless thoughts and questions envelop her and the promise of death approaches like a boundless and heavy storm cloud. Unaware that it was the cats, the pack races across the state, in search of the wolves they think have March. Meanwhile, Avery is assembling a diverse group of weres to aid in the invasion and to rescue the girl he swore to protect. And while Marchs human friends may not know her secret, Ruthie Birch does. Enlisting the help of an ally unwelcome by the others, Ruthie devises a plan to join Averys army, whether he likes it or not. And Saffron Kellum is forced to leave her comfort zone when her twin brother goes missing and she discovers shes the only one who can find him. In Book Five of the Lone March Series, March Howe finds herself in an existential crisis that can only be soothed by the goddess shes estranged herself from. While the cats make beastly plans for the last female were-wolf, her family and friends make plans of their own that involve uncovering secrets and even double-crossing each other to save the last she-wolf. Will this contrasting group be able to work together to save March, or will the last of the were-wolves lose everything when their old enemy threatens to destroy the only hope they have?
