

Chefs Can Save the World

Chefs Can Save the World is Jeremy Barlows call to action for everyone who prepares, serves, consumes or simply enjoys food. We all have a responsibility to pay more attention to what we eat, where it comes from, and how it affects the world around us. Jeremys journey is a discovery of how our health, our environment, our energy, our economy, and our security are inextricably tied to the food system. And, with half of all food dollars spent on dining out, our nations chefs hold significant influence to effect change. Jeremy gives us the benefit of his experience and research in this book, getting at the heart of what we need to know to start making better choices. Jeremy challenges us all to use our purchasing power to achieve a food system that is not just sustainable, but restorative one that ultimately can solve the most pressing human challenges of our time.
