Youve spent the past 3 years sinking your life into your small business or online ventures and have some results. But can you really say youre solving a problem that your customers really have? Are they running to your door waiting to throw money at you so they can get their pain eased? Do you even know who your real customers are? What they look like, what they do on a daily basis, what small details in their normal life are you missing that are stopping you from getting more out of your business? Can you wrap your head around just how much money youve left on the table because you dont know what your niche audience needs to make their lives easier? Could finding out stop you from running up against the 5 year failure mark that most small businesses slam into? Look. You need to stop guessing what they want and start knowing. You need quality responses from real people. You want to pay a fraction of the cost of traditional market research. Real Marketing Matters To You I had this same problem as you some time ago. Thats when I started making quizzes with survey questions embedded in them. Thats when I started emailing my customers, hopping on the line, and getting some real feedback as to what they needed in their daily duties. And then I wanted to expand. I started helping people in oil & gas, healthcare, fitness & health, personal development, entrepreneurship, internet marketing, teaching, training, and so much more. How the heck was I supposed to know what these people really needed? I asked. Hundreds of thousands of test results later, several thousands in market research and surveys, hundreds of hours in analysis and assessment... all done so I could get a better understanding of the real pains at

hand for my potential clients. And now you can have this mound of resource-intensive research rolled up into a simple, effective, and extremely affordable package with the Real Marketing series.
