

The Science of Getting Rich with EFT (Emotional Freedom Techniques)

Tap along to the book that inspired the hit Law of Attraction movie, *The Secret*! In addition to the Tapping Scripts, you will also receive the full original text. Says author Dena Przybyla: I have always known that our thoughts have power, that our thoughts form intentions, and that our intentions can shape how our lives unfold. Seeing the movie *The Secret* helped crystallize many of these ideas for me and even gave this process a name: The Law of Attraction. I have studied many other approaches to Intention/ Manifestation since then, but I believe *The Secret* remains a great primer for the novice intender. During my studies, I also came upon a little gem of a book that, it turns out, was the impetus for the creation of the movie *The Secret* Wallace D. Wattles *The Science of Getting Rich*. Although it was written in 1910 and the language is a bit antiquated, the principles it puts forth are timeless. Imagining my focused thought-energy shaping the formless stuff of pure potential all around me into my life experience is visceral and empowering! The book brought this process to my conscious awareness and I've never forgotten it. It excites me to think that the raw, pure potential for any goal I can dream up is all around me at all times, and it is up to me to choose how to shape it! Having worked with EFT (Emotional Freedom Techniques) since 2006, I've been aware of its power as a reprogramming tool for some time. I got the idea that it might be helpful for people to tap along with the wisdom behind *The Secret*, and the result is this book. I hope you enjoy tapping along to *The Science of Getting Rich* and integrating its powerful concepts at a deep, energetic level. You CAN reprogram yourself for the life you desire. My sincere wish is that this book helps you make full use of the Law of Attraction and live your Ideal Life in every area! Learn more about Dena Przybyla at www.eft-seattle.com
