

Privacy Enhancing Technologies: 4th International Workshop, PET 2004, Toronto, Canada, May 26-28, 2004, Revised Selected Papers (Lecture Notes in Computer Science / Security and Cryptology)

The first workshop in this series was held at the International Computer Science Institute in Berkeley and was published as LNCS 2009 under the name Workshop on Design Issues in Anonymity and Unobservability.

Subsequent Privacy Enhancing Technologies (PET) workshops met in San Francisco in 2002 (LNCS2482) and Dresden in 2003 (LNCS2760). This volume, LNCS3424, holds the proceedings from PET 2004 in Toronto. Our 2005 meeting is scheduled for

Dubrovnik, and we hope to keep finding new and interesting places to visit on both sides of the Atlantic - or beyond. An event like PET 2004 would be impossible without the work and dedication of many people. First and foremost

we thank the authors, who wrote and submitted 68 full papers or panel proposals, 21 of which appear herein. The Program Committee produced 163 reviews in total. Along the way, they were assisted in reviewing by Steven Bishop,

Rainer Bohme, Sebastian Clau?, Claudia D? ?az, Richard E. Newman, Ulrich Flegel, Elke Franz, Stefan Kopsell, Thomas Kriegelstein, Markus Kuhn, Stephen Lewis, Luc Longpre, Steven M-doch, Shishir Nagaraja, Thomas Nowey, Peter Palfrader, Lexi Pimenidis, Klaus Ploessl, Sivaramkrishnan Rajagopalan, Marc Rennhard, Leo Reyzin, Pankaj Rohatgi, Naouel Ben Salem, Sandra Steinbrecher, Mike Szydlo, Shabsi Wal?sh, Jie Wang, Brandon Wiley, and Shouhuai Xu.
