

Lazy Content Creation: Website Content Made Easy

Lazy Content Creation hails the end of your website content creation nightmares and is perfect for you if...- You're sick of being chained to your computer for hours on end trying to churn out one article after another- You're fed up with paying hand-over-fist for freelance writers who only produce mediocre content- You want to grow your content (and traffic) so you can enjoy life more- You want to launch more sites but you don't have the time or money to create all the content you need- You suffer from writer's block and struggle to get your words down on the page! If there's one thing that we can all agree on it's that the more high quality, unique website content you have on your site the more traffic you're going to receive as a result. After all it's simple math more website content equals more pages indexed in the search engines which means more listings and consequently more free traffic as a result. Over the last few years I've dived head-first into the world of rapid website content creation, tested out dozens of ideas and hundreds of tools and through a constant process of trial and improvement I now have a whole suite of techniques for rapidly creating high quality website content with the minimum of time. In this chunky 20,000+ word book you're going to learn all manner of extra ways to rapidly produce large amounts of website content in the easiest ways possible. The report will help you take your content creation to the next level and boost your results even further if you choose to do so. Just a few of the things you're going to uncover include- 17 amazingly simple yet powerful types of website content you can produce in next to no time (find out just how easy it can really be to fill your sites with content)- Detailed instructions on a whole raft of free WordPress plugins you can leverage for rapid, high-quality content creation (see exactly how I use them)- The top 5 groups of people to seek out for user-generated

content submissions (stop wasting time on techniques that dont work these five groups of people are desperate to help fill your site with content)- How to get more traffic from your existing website content (more profit in less time)- The most viral type of website content Ive ever tried (and how to curate it or create it yourself for free in minutes)- How to cross-pollinate your social media traffic and blog traffic so they both work symbiotically and grow each other on autopilot- How to turn the data already on your computer into a never-ending supply of content for your sites- The sneaky content creation trick I use to coax people into building me content around highly profitable keywordsLet me ask you a question; how much does an outsourced article normally cost you? At the low end of the spectrum maybe you pay a writer from Fiverr. It wont be great and you wouldnt want a manual inspection by Google but at least there are words on a page.However when I want good quality content for my sites that will stand up to a Google inspection I outsource content to places like Text Broker and The Content Authority and for a good quality article of a decent length I expect to pay \$10-15. It aint cheap, but at least I end up with something I can put on my site and not worry about.The fact is though that this one book is cheaper than the cost of even a half-hearted outsourced article. And instead of some junk youll feel embarrassed about publishing, youll be able to fill your sites with a never-ending supply for top quality website content. Surely that makes this the best-value book on website content creation around...?Download your copy now and get gain access the simplest and most complete suite of tools, strategies and ideas for website content creation the easy way.
