

## The One Thing (A Hollywood Timelines Novel)

When everything falls apart, hes the one thing that holds me together I have the life everyone wants. Ive got my own TV show, money, the guy, and invites to all of Hollywoods most exclusive parties. But Im beginning to miss all the things you normal people take for granted. Privacy, love, and a simple trip to the store without being asked for my autograph. Everything I do gets scrutinized and plastered on the front of every tabloid. I dont deal with it like I should, and Im not turning into the person I always envisioned. Everyone wants to be my best friend, but Ive never felt more alone... Until I meet him. The indie musician who could care less about my social status or whats in my bank account. He wants to make me happy. The problem is he wants to make everyone else happy too. The world is against us, pushing us apart, and its beginning to feel as if we are only meant to be friends.
