Increase Efficiency, Save Time and Accomplish More - Discover These Powerful Time Management Secrets and Transform Your Life Now! You don't want to waste your time and I don't want to waste your time. That's why I chose to keep this guide short and to the point, providing only necessary, instructive and helpful information to you! If there is any resource in this world that is given to all with equal measure, it is time. The twenty-four hours in a day given to the world's richest man are the same twenty-four hours given to the poorest of all. Every human being has the same number of hours, minutes and seconds to do with them as they see fit. Whether it is to work in an office, to practice for a race, to revise for a term paper, to go visit the countryside, to bake a cake or whatever activity a person can do, it's all the same for everyone. This unique quality of time exists for our good and for its sake. Time is the only coin of your life. It is the only coin you have and only you can determine how it will be spent. Be careful lest you let other people spend it for you. This quote by Carl Sandburg captures the real essence and importance of time, which has been the subject of discussion by people all over the world through decades regarding how it is used and managed. But someone may ask, what is time? The dictionary defines time as the progression into the future with the present events passing into the past. You cannot learn to manage time if you have no understanding what time is. As we delve deeper into understanding time, its basics and time management, I want to pose this question to you: Are you ever on time, punctual or late for your appointments and meetings? If your answer is more on the negative, you have a problem with managing your time but worry no more, because you will find help in this book. Still if your response is on the positive, continue reading and after it all, you will probably learn something
