

Visions for a Better World

You are a Conscious Creator and you can begin to change our world to transform it with peace, prosperity, ecological balance, greater human tolerance, kindness and love. You can do this through visualization -- by creating mind pictures of the world we want to live in, the world we want to claim as our future. The more people who share the same vision, the more powerful our ability to manifest that wish or desire. Science has proven that when waves of energy join together in sync, they become infinitely more impactful. So meditate to these visions or bring your friends together for a Vision-in. Its time for you to manifest a New Future.
