

Bath Iron Works

Bath Iron Works was established by Gen. Thomas Hyde in 1884 and launched its first ship in 1891. Since then, the shipyard on the Kennebec River has built dozens of luxurious yachts, hardworking freighters, tugs, trawlers, lightships, and more than two hundred twenty warships for the U.S. Navy. Today, Bath Iron Works continues a shipbuilding tradition that began nearly four hundred years ago when the first ship built in America was constructed just a few miles downriver from Bath. Bath Iron Works showcases a unique collection of photographs that provides a rare view inside one of the nations great shipyards. The book shows the yards origins in a few simple buildings, its expansion into a modern shipbuilding facility, and its rapid growth into an industrial powerhouse during World War II. During these years, Bath Iron Works produced famous ships such as the Americas Cup defender Ranger, the yachts Aras and Hi-Esmaro, the record-setting destroyer USS Lamson, and fully one fourth of all destroyers built for the U.S. Navy during World War II. Bath Iron Works gives an insiders view of these great vessels and many others, as skilled craftspeople turn raw materials into complex ships, each uniquely suited to its purpose. This collection of shipbuilding photographs brings to life the proud history of Bath Iron Works.
